---

TO CA OEHHA,

My name is Sharon Larsen and I recently attended the hearing on determining a "SAFE" level of glyphosate to be allowed in our water. I assure you that more people would have been there to speak AGAINST ANY level of POISON being allowed in their water if this subject had been presented to the public in such a way that it was fully understood. THE PUBLIC IS NOT BEING EDUCATED!

My grand daughter, Tawny, has low tone cerebral palsy and is extremely sensitive. She is highly allergic to many substances and has a vulnerable immune system. You may remember that I spoke with you about her at the meeting in June in Sacramento. My daughter ,Jennifer, has epilepsy and has to take 3 seizure medications, all of which affect her liver. She cannot afford to receive more liver damaging substances from the water she drinks.

Why are you proposing a level thousands of times higher than PROVEN to cause liver disease which is a precursor to cancer and millions of time higher than shown to stimulate the growth of breast cancer cells?

It is 2.2 times higher than American children are already being exposed and nearly 6 times higher than the EPA allows.

I could go on and on with statistics you already know. I'm sure you are facing big money interests from Monsanto and their supporters in our political system.

Dear friends, you have to play God right now because you are holding in your hands the future of our children and future generations , as has been shown with Agent Orange from the Viet Nam war, another Monsanto product.

With the utmost respect I ask for all our sakes that you choose NO GLYPHOSATE AS THE SAFE LEVEL! Don't let Monsanto greed destroy more lives.

Warm regards,  
Sharon Larsen
